To whom it may concern;

Carles Bertran has worked with Serotta as an engineering intern since 9/4/10. During his time here he has demonstrated great capacity and motivation in solving engineering problems. He successfully contributed his knowledge and skills to our engineering department and has proven to be able to work as a dedicated team member.

He has developed technical knowledge while working in accordance with our manufacturing procedures, showing capability to adapt to new environments and has shown effective communication skills with our entire staff.

If we had an opening in our manufacturing & engineering department I would have most certainly offered Carles a position here. I am certain that Mr. Bertran will make an excellent hire for your company should you chose to bring him on board.

Sincerely yours,

Ben Serotta, Pres.
